Subject Index of Volume 9

Acetylpsoralen
photochemical and photobiological properties of 4,8-dimethyl-5′-acetylpsoralen, 43
Aggregation state
effects of a non-ionic detergent on the spectral properties and aggregation state of the light-harvesting chlorophyll *a*/*b* protein complex (LHCII), 235
Alga
kinetic analysis of the step-up photophobic response of the flagellated alga *Euglena gracilis* in culture medium, 75
Antarctic
ozone holes and biological consequences, 249

Blue light effect
photostimulation of conidiation in mutants of *Neurospora crassa*, 189
Brain tumours
photodynamic therapy of brain tumours — post-operative "field fractionation", 117

5,6-Carboxyfluorescein
preliminary study of tumour detection by a pH-dependent fluorescent probe *in vivo*, 219
Carotenoids
structures and functions of carotenoids in photosynthetic, 265
Chick embryo fibroblast
phototoxicity induced by nalidixic and oxolinic acids: decrease in cell survival of chick embryo fibroblasts and Hep-2 cells, 229
Chlorophyll *b*
chlorophyll *b* in solution: fluorescence lifetimes, absorption and emission spectra as criteria of purity, 35
Circular dichroism
effects of a non-ionic detergent on the spectral properties and aggregation state of the light-harvesting chlorophyll *a*/*b* protein complex (LHCII), 235
Criteria of purity
chlorophyll *b* in solution: fluorescence lifetimes, absorption and emission spectra as criteria of purity, 35
Culture medium
kinetic analysis of the step-up photophobic response of the flagellated alga *Euglena gracilis* in culture medium, 75

DNA cross-linking
photochemical and photobiological properties of 4,8-dimethyl-5′-acetylpsoralen, 43
DNA damage
changes in cell cycle distribution of V79 Chinese hamster fibroblasts after irradiation at different wavelengths, 171

Electron microscopy
influence of photodynamic therapy on the ultrastructure of the normal rat bladder, 295
Electron spin resonance
near-UV-induced radicals in *Propionibacterium acnes*, studied by electron spin resonance spectrometry at 77 K, 181
Emission pattern
two-dimensional imaging and counting of ultraweak emission patterns from injured plant seedlings, 211
Emission spectroscopy
the effects of UVB irradiation on the lifetimes of singlet excitons in isolated photosystem II membrane fragments from spinach, 201
Endoperoxide of 3,3′-(1,4-naphthylidene)-dipropionate ($NDPO_2$)
activity of thiols as singlet molecular oxygen quenchers, 105
Energy transfer
structures and functions of carotenoids in photosynthetic, 265

Elsevier Sequoia/Printed in The Netherlands

orientation and thermal deactivation of pigments in thylakoid membranes lacking the light-harvesting complexes, 61
Epidermal melanin pigmentation
photoprotection by melanin, 135
Euglena
kinetic analysis of the step-up photophobic response of the flagellated alga *Euglena gracilis* in culture medium, 75
Excited states
structures and functions of carotenoids in photosynthetic systems, 265

Flagella
kinetic analysis of the step-up photophobic response of the flagellated alga *Euglena gracilis* in culture medium, 75
Flavoprotein
photostimulation of conidiation in mutants of *Neurospora crassa*, 189
Flow cytometry
changes in cell cycle distribution of V79 Chinese hamster fibroblasts after irradiation at different wavelengths, 171
Fluorescence
preliminary study of tumour detection by a pH-dependent fluorescent probe *in vivo*, 219
Foster energy transfer
dark interaction of 5-methoxypsoralen and 8-methoxypsoralen with erythrocyte ghosts: a fluorescence and circular dichroism study, 161
Furocoumarins
mechanisms of photodynamic effects of furocoumarins, 1

Glycine max
two-dimensional imaging and counting of ultraweak emission patterns from injured plant seedlings, 211

Hairless mouse
time-dependent decrease in sunscreen protection against chronic photodamage in UVB-irradiated hairless mouse skin, 323
Hep-2
phototoxicity induced by nalidixic and oxolinic acids: decrease in cell survival of chick embryo fibroblasts and Hep-2 cells, 229
Human erythrocyte ghosts
dark interaction of 5-methoxypsoralen and 8-methoxypsoralen with erythrocyte ghosts: a fluorescence and circular dichroism study, 161
Hydrogen peroxide
two-dimensional imaging and counting of ultraweak emission patterns from injured plant seedlings, 211

Induced circular dichroism
dark interaction of 5-methoxypsoralen and 8-methoxypsoralen with erythrocyte ghosts: a fluorescence and circular dichroism study, 161
Intrinsic fluorescence
dark interaction of 5-methoxypsoralen and 8-methoxypsoralen with erythrocyte ghosts: a fluorescence and circular dichroism study, 161
IR photoemission
activity of thiols as singlet molecular oxygen quenchers, 105
Isoelectrofocusing
effects of a non-ionic detergent on the spectral properties and aggregation state of the light-harvesting chlorophyll *a*/*b* protein complex (LHCII), 235
Isolation
chlorophyll *b* in solution: fluorescence lifetimes, absorption and emission spectra as criteria of purity, 35
Isomerization
structures and functions of carotenoids in photosynthetic, 265

LHCII
effects of a non-ionic detergent on the spectral properties and aggregation state of the light-harvesting chlorophyll *a*/*b* protein complex (LHCII), 235
Light
kinetic analysis of the step-up photophobic response of the flagellated alga *Euglena gracilis* in culture medium, 75
Light insensitive mutants
photostimulation of conidiation in mutants of *Neurospora crassa*, 189

Light-harvesting complex
structures and functions of carotenoids in photosynthetic, 265
orientation and thermal deactivation of pigments in thylakoid membranes lacking the light-harvesting complexes, 61
Lipid peroxidation
phthalocyanine-sensitized lipid peroxidation in cell membranes: use of cholesterol and azide as probes of primary photochemistry, 307
Liposomes
photosensitized production of singlet oxygen by merocyanine 540 bound to liposomes, 281

Marine organisms
responses of aquatic photosynthetic organisms to increased solar UVB, 239
Melanin
photoprotection by melanin, 135
Membranes
phthalocyanine-sensitized lipid peroxidation in cell membranes: use of cholesterol and azide as probes of primary photochemistry, 307
Merocyanine 540
photosensitized production of singlet oxygen by merocyanine 540 bound to liposomes, 281
Microcirculation
influence of photodynamic therapy on the ultrastructure of the normal rat bladder, 295
Mutagenicity
photochemical and photobiological properties of 4,8-dimethyl-5′-acetylpsoralen, 43

Nalidixic acid
phototoxicity induced by nalidixic and oxolinic acids: decrease in cell survival of chick embryo fibroblasts and Hep-2 cells, 229
Neurospora crassa
photostimulation of conidiation in mutants of *Neurospora crassa*, 189

Ocular tumours
photodynamic therapy for ocular tumors, 119
Orientation
orientation and thermal deactivation of pigments in thylakoid membranes lacking the light-harvesting complexes, 61
Oxolinic acid
phototoxicity induced by nalidixic and oxolinic acids: decrease in cell survival of chick embryo fibroblasts and Hep-2 cells, 229
Ozone depletion
ozone holes and biological consequences, 249
responses of aquatic photosynthetic organisms to increased solar UVB, 239

pH
preliminary study of tumour detection by a pH-dependent fluorescent probe *in vivo*, 219
Pharyngeal tumours
potential of photodynamic therapy in the treatment of pharyngeal tumours: the clinical point of view, 122
Phaseolus angularis
two-dimensional imaging and counting of ultraweak emission patterns from injured plant seedlings, 211
Photochemotherapy
photochemical and photobiological properties of 4,8-dimethyl-5′-acetylpsoralen, 43
Photoconidiation
photostimulation of conidiation in mutants of *Neurospora crassa*, 189
Photodegradation
the effect of the antioxidant spermine on the photophysical processes and photodegradation of tryptophan in aqueous solution at 293 K, 355
Photodiagnostic
preliminary study of tumour detection by a pH-dependent fluorescent probe *in vivo*, 219
Photodynamic therapy
challenges for photodynamic therapy in the treatment of gistro intestinal tumours, 372
influence of photodynamic therapy on the ultrastructure of the normal rat bladder, 295

mechanisms of photodynamic effects of furocoumarins, 1
origin and meaning of the term "photodynamic" (as used in "photodynamic therapy", for example), 369
photodynamic therapy for ocular tumors, 119
photodynamic therapy of brain tumours — post-operative "field fractionation", 117
potential of photodynamic therapy in the treatment of pharyngeal tumours: the clinical point of view, 122
preparative, analytical and fluorescence spectroscopic studies of sulphonated aluminium phthalocyanine photosensitizers, 87
Photohaemolysis
mechanisms of photodynamic effects of furocoumarins, 1
Photoinactivation
near-UV-induced radicals in *Propionibacterium acnes*, studied by electron spin resonance spectrometry at 77 K, 181
Photoprotection
effect of the antioxidant spermine on the photophysical processes and photodegradation of tryptophan in aqueous solution at 293 K, 355
photoprotection by melanin, 135
time-dependent decrease in sunscreen protection against chronic photodamage in UVB-irradiated hairless mouse skin, 323
Photosensitization
mechanisms of photodynamic effects of furocoumarins, 1
photosensitized production of singlet oxygen by merocyanine 540 bound to liposomes, 281
phthalocyanine-sensitized lipid peroxidation in cell membranes: use of cholesterol and azide as probes of primary photochemistry, 307
preparative, analytical and fluorescence spectroscopic studies of sulphonated aluminium phthalocyanine photosensitizers, 87
Photosensory
kinetic analysis of the step-up photophobic response of the flagellated alga *Euglena gracilis* in culture medium, 75
Photosynthesis
effects of a non-ionic detergent on the spectral properties and aggregation state of the light-harvesting chlorophyll *a*/*b* protein complex (LHCII), 235
structures and functions of carotenoids in photosynthetic, 265
Photosystem II
effect of UVB irradiation on the lifetimes of singlet excitons in isolated photosystem II membrane fragments from spinach, 201
Phototoxicity
phototoxicity induced by nalidixic and oxolinic acids: decrease in cell survival of chick embryo fibroblasts and Hep-2 cells, 229
Phthalocyanine
phthalocyanine-sensitized lipid peroxidation in cell membranes: use of cholesterol and azide as probes of primary photochemistry, 307
preparative, analytical and fluorescence spectroscopic studies of sulphonated aluminium phthalocyanine photosensitizers, 87
Picosecond fluorescence
effects of a non-ionic detergent on the spectral properties and aggregation state of the light-harvesting chlorophyll *a*/*b* protein complex (LHCII), 235
Plant seedling
two-dimensional imaging and counting of ultraweak emission patterns from injured plant seedlings, 211
Polyamines
effect of the antioxidant spermine on the photophysical processes and photodegradation of tryptophan in aqueous solution at 293 K, 355
Polyvinyl alcohol film
orientation and thermal deactivation of pigments in thylakoid membranes lacking the light-harvesting complexes, 61
Propionibacterium acnes
near-UV-induced radicals in *Propionibacterium acnes*, studied by electron spin resonance spectrometry at 77 K, 181

Proteolysis
kinetic study of the UV absorption changes of normal purple membranes and purple membranes digested by proteolytic enzymes, 97
Psoralen
dark interaction of 5-methoxypsoralen and 8-methoxypsoralen with erythrocyte ghosts: a fluorescence and circular dichroism study, 161
Purple membrane
kinetic study of the UV absorption changes of normal purple membranes and purple membranes digested by proteolytic enzymes, 97
PUVA phototherapy
mechanisms of photodynamic effects of furocoumarins, 1
Pyrimidine dimers
changes in cell cycle distribution of V79 Chinese hamster fibroblasts after irradiation at different wavelengths, 171

Radical species
near-UV-induced radicals in *Propionibacterium acnes*, studied by electron spin resonance spectrometry at 77 K, 181

Singlet excitons
effect of UVB irradiation on the lifetimes of singlet excitons in isolated photosystem II membrane fragments from spinach, 201
Singlet oxygen
activity of thiols as singlet molecular oxygen quenchers, 105
photochemical and photobiological properties of 4,8-dimethyl-5′-acetylpsoralen, 43
photosensitized production of singlet oxygen by merocyanine 540 bound to liposomes, 281
phthalocyanine-sensitized lipid peroxidation in cell membranes: use of cholesterol and azide as probes of primary photochemistry, 307
Skin aging
time-dependent decrease in sunscreen protection against chronic photodamage in UVB-irradiated hairless mouse skin, 323
Solar UVB
responses of aquatic photosynthetic organisms to increased solar UVB, 239
Spermine
the effect of the antioxidant spermine on the photophysical processes and photodegradation of tryptophan in aqueous solution at 293 K, 355
Sunscreens
time-dependent decrease in sunscreen protection against chronic photodamage in UVB-irradiated hairless mouse skin, 323

Thermal deactivation
orientation and thermal deactivation of pigments in thylakoid membranes lacking the light-harvesting complexes, 61
Thiols
activity of thiols as singlet molecular oxygen quenchers, 105
Thylakoid membranes
orientation and thermal deactivation of pigments in thylakoid membranes lacking the light-harvesting complexes, 61
Time-correlated single-photosensitizers
preparative, analytical and fluorescence spectroscopic studies of sulphonated aluminium phthalocyanine photosensitizers, 87
Time-resolved fluorescence
chlorophyll *b* in solution: fluorescence lifetimes, absorption and emission spectra as criteria of purity, 35
Tryptophan
effect of the antioxidant spermine on the photophysical processes and photodegradation of tryptophan in aqueous solution at 293 K, 355
Tumours
challenges for photodynamic therapy in the treatment of gistro intestinal tumours, 372
photodynamic therapy for ocular tumors, 119
photodynamic therapy of brain tumours — post-operative "field fractionation", 117
potential of photodynamic therapy in the treatment of pharyngeal tu-

mours: the clinical point of view, 122
preliminary study of tumour detection by a pH-dependent fluorescent probe *in vivo*, 219
Two-dimensional photon counting
two-dimensional imaging and counting of ultraweak emission patterns from injured plant seedlings, 211

Urinary bladder
influence of photodynamic therapy on the ultrastructure of the normal rat bladder, 295
UV effects
changes in cell cycle distribution of V79 Chinese hamster fibroblasts after irradiation at different wavelengths, 171
UV irradiation
near-UV-induced radicals in *Propionibacterium acnes*, studied by electron spin resonance spectrometry at 77 k, 181
UV radiation
time-dependent decrease in sunscreen protection against chronic photodamage in UVB-irradiated hairless mouse skin, 323
UV transient absorption
kinetic study of the UV absorption changes of normal purple membranes and purple membranes digested by proteolytic enzymes, 97
UVB
effect of UVB irradiation on the lifetimes of singlet excitons in isolated photosystem II membrane fragments from spinach, 201
